1. The following information, although outdated, is sent to you for whatever interest it may have.
 1. From 1945 to 1948, Koch und Sterzel, Dresden, built a one-and-one-half-million-volt installation described as an installation for the acceleration of electrons. The engineer in charge was Stejskal (SED). A model was exhibited at the Leipzig Fair this year. The installation was built for Russia.
- The so-called Energieplan for 1951 includes the following:
- a. Reconstruction of Kraftwerk Trattendorf
 - b. Reconstruction of another large power station near Görlitz
 - c. Reconstruction of Kraftwerk Elbe in Dessau
 - d. Reconstruction of 220-KV power lines to Berlin
3. Since 1945, the OSW has reportedly built 10 electron microscopes for Russia and three for the DDR. Of the three, one went to the Zeiss firm, one to Riems, and one to Berlin University.*
 4. According to [REDACTED] some people are signing new contracts to work in Russia for three years. He did not know any names but obviously meant people from the electronics field.

* Comment: May possibly be the Buch Institute (Prof. Jung).
